

Date: 6 Nov 2020

## **Coronavirus (COVID-19) – Important advice for people with dermatological conditions (not cancerous)**

This leaflet provides you and your family with information about how coronavirus (COVID-19) might affect you if you have a dermatological condition that is not cancerous.

The most common symptoms of coronavirus (COVID-19) are a new and continuous cough, loss of sense of smell or taste and/or a fever/high temperature (37.8C or greater).

A new continuous cough is where you:

- have a new cough that's lasted for an hour
- have had 3 or more episodes of coughing in 24 hours
- are coughing more than usual

A high temperature is feeling hot to the touch on your chest or back (you don't need to measure your temperature). You may feel warm, cold or shivery.

Some people will have more serious symptoms, including pneumonia or difficulty breathing, which might require admission to hospital.

Your safety is our priority and we aim to minimise disruption to essential services. The NHS will continue to provide treatment for emergency and urgent care for all patients. With that in mind we have listed some important information below. This includes answers to questions you may have and directions to services that can offer advice and support.

**Some groups of people are considered to be clinically at high risk of severe illness from coronavirus (COVID-19). If you are in this group you will have received a letter from NHS Scotland or been contacted by your doctor. If you are in this group you should be following shielding advice which is to strictly follow physical distancing and hygiene measures. More information can be found here:**

<https://www.nhsinform.scot/illnesses-and-conditions/infections-and-poisoning/coronavirus-covid-19/coronavirus-covid-19-shielding>

<https://www.gov.scot/publications/covid-shielding/pages/overview/>

If you have a dermatological condition AND have been asked to shield you will find guidance for your situation elsewhere on this webpage

<https://www.gov.scot/publications/coronavirus-covid-19-tailored-advice-for-those-who-live-with-specific-medical-conditions/>

### **What should I know about coronavirus (COVID-19) and dermatological conditions?**

Some people with dermatological conditions have a higher risk of becoming severely ill if they catch coronavirus (COVID-19) because their immune system is weakened. If this applies to you, you will be contacted directly by the NHS with advice that you should stay at home at all times and avoid all face-to-face contact until told otherwise. It is possible this advice will change as more information is available and, if so, you will be contacted again.

Further information can be found at the British Association of Dermatologists:  
<http://www.bad.org.uk/healthcare-professionals/covid-19/covid-19-immunosuppressed-patients>.

### **Where can I get support?**

If you have concerns related to your condition or your treatment your first point of contact should be your hospital dermatology team.

The NHS Inform Scotland website has up-to-date information and answers to frequently asked questions.

[www.nhsinform.scot/coronavirus](http://www.nhsinform.scot/coronavirus).

A national helpline has been set up to provide essential assistance to those who don't have a network of support

If you are unable to access the food and essentials you need, or if you cannot afford to buy them, please phone the national helpline on 0800 111 4000, or contact via textphone on 0800 111 4114. The helpline is open office hours Monday to Friday and will connect you to your local authority who can help provide support or signpost on to other organisations to help you. Further information on the range of support available can be found at <https://www.mygov.scot/coronavirus-covid-19/> .

If you receive support from health and social care organisations, such as care support through your local authority, this will continue as normal. Your health or social care provider will be asked to take additional precautions to make sure that you're protected.

For other **non-emergency** and non COVID-19 related health concerns, your GP or calling 111 should still be your first point of contact. At present they are likely to assess you over the telephone or via video link rather than see you in person to reduce the risk of infection from coronavirus (COVID-19).

## What is the risk to me if I have a dermatological condition?

People receiving immune-suppression therapies, which put them at higher risk of severe illness from coronavirus (COVID-19) will receive a letter from NHS Scotland outlining more specific advice to keep themselves safe.

The following provides practical guidance on whether you might be in the high risk group or not. The risk to an individual will also take account of other factors such as age and other health conditions.

**High Risk:** You are considered 'high risk' if you are taking:

- Prednisolone more than 20mg/ day or more than 5mg/ day plus another medication that suppresses the immune system
- Influximab infusions
- Two or more medications at once, that suppress the immune system e.g. biologics, methotrexate, ciclosporin, azathioprine, mycophenolate, apremilast, skilarence, fumaderm
- One medication that suppresses the immune system (as above) if you are over 70
- One medication that suppresses the immune system (as above) if you have one of more of the following conditions: diabetes, lung disease (e.g. asthma/ COPD), ischaemic heart disease, chronic kidney disease, high blood pressure.

**2. Moderate Risk:** You are considered moderate risk if you are taking:  
One medication that suppresses the immune system if you are otherwise well and have no other health problems. e.g: Biologics, Methotrexate, Ciclosporin, Azathioprine, Mycophenolate, Apremilast, Skilarence/ Fumaderm.

**3. Low risk:** You are not considered at increased risk if you are on the following medications: topical skin treatments (creams, gels, etc), Hydroxychloroquine, Acitretin, Alitretinoin, Isotretinoin, Dapsone, Colchicine.

If your condition falls within the highest risk group you should follow the shielding advice set out on the NHS Inform website.

<https://www.nhsinform.scot/illnesses-and-conditions/infections-and-poisoning/coronavirus-covid-19/coronavirus-covid-19-shielding>.

If you have questions about this please contact your hospital dermatology team.

## I did not receive a letter from the NHS, but I am currently being treated for a dermatological condition, do I need to do anything differently to reduce the risk of coronavirus (COVID-19)?

Everyone should be following physical distancing measures to reduce the transmission of COVID-19. From the 1 August shielding has been paused, Most people who were shielding can now follow the [advice for the general population](#), however, you should strictly follow [physical distancing and hygiene measures](#). You may also want to think about the levels of risk associated with work and daily activities.

<https://www.nhsinform.scot/illnesses-and-conditions/infections-and-poisoning/coronavirus-covid-19/coronavirus-covid-19-shielding>.

If you did not receive a letter, you may still be considered at a higher risk than the general population so it's important you are careful in trying to reduce the risk of becoming infected with coronavirus (COVID-19). You should follow the most up to date guidance on physical distancing, which will protect you and others from picking up the virus:

<https://www.nhsinform.scot/illnesses-and-conditions/infections-and-poisoning/coronavirus-covid-19/coronavirus-covid-19-general-advice>

### **Will my treatment change?**

Your treatment plan is individual to you. Your dermatologist or other healthcare professional providing your care may review your treatment plan with you to ensure it still best suits your needs and discuss any changes that may be appropriate.

This will only ever be done to reduce overall risk and harm. It is important to note that if you have any concerns about your condition at this time then you should contact your dermatology team.

### **Should I still go to hospital appointments?**

Your specialist or one of their team may contact you to change your appointment. If you have not been contacted, please assume that the appointment is to go ahead as arranged.

Anyone who feels that their condition is deteriorating and they need to be seen sooner than their scheduled appointment should contact their GP or clinician who will be able to provide further advice.

Additionally, if you are unwell and require urgent care which is not COVID-19 related you should still access the care you need. This includes presenting to A&E if required, and calling your GP or hospital clinician for further advice on your condition.

If you require immediate medical attention such as if you have acute chest pain or sudden breathlessness and you need immediate medical attention call 999.

If you have symptoms of possible coronavirus (COVID-19) infection then do not come to the hospital. Instead you should check your symptoms against the information on NHS Inform <https://www.nhsinform.scot/illnesses-and-conditions/infections-and-poisoning/coronavirus-covid-19> and call 111 to seek further advice.

### **Can I have visitors in hospital?**

Information about visiting loved ones in hospital can be found [here](#).

If hospital admission is likely please remember to pack your mobile phone and phone charger so you can keep in touch with relatives and friends.

### **Will the symptoms be different because I have a dermatological condition and what should I look out for?**

The symptoms of coronavirus (COVID-19) will be the same as the general population.

NHS Inform Scotland provides up to date advice about coronavirus (COVID-19) <https://www.nhsinform.scot/illnesses-and-conditions/infections-and-poisoning/coronavirus-covid-19>.

We recommend everyone follows the NHS and Government advice about what to do if they are concerned they have come into contact with someone with confirmed coronavirus.

### **Who should I contact if I become unwell or develop side effects while on my current medicines?**

If you have acute chest pain, significant bleeding or you need immediate medical attention call 999.

If you have symptoms of coronavirus (COVID-19) while you are on immunosuppressive therapy, or for any side effects of drug treatment, call 111. They will ask a series of questions and will give advice or arrange for you to have a medical review at your nearest hospital.

If you think you may have coronavirus (COVID-19), developed a new continuous cough, a fever/high temperature and/or a loss of sense of taste or smell, do not go to your GP, pharmacy or hospital.

You should phone 111 if:

- your symptoms worsen,
- breathlessness develops or worsens,
- your symptoms haven't improved in 7 days

Tell the call handler about your dermatological condition.

If you have a medical emergency, phone 999 and tell them if you have coronavirus (COVID-19) symptoms.

### **What should I do to collect my routine medications?**

You should ask family, friends and neighbours to support you and use online services to arrange deliveries of food and medicines where possible if you are not able or advised not to leave your home.

A national helpline has been set up to provide essential assistance to those who don't have a network of support

If you are unable to access the food and essentials you need, or if you cannot afford to buy them, please phone the national helpline on 0800 111 4000, or contact via textphone on 0800 111 4114. The helpline is open office hours Monday to Friday and will connect you to your local authority who can help provide support or signpost on to other organisations to help you. Further information on the range of support available can be found at <https://www.mygov.scot/coronavirus-covid-19/>.

If you receive support from health and social care organisations, such as care support through your local authority, this will continue as normal. Your health or social care provider will be asked to take additional precautions to make sure that you're protected.

### **Are my carers, and/or friends and family still allowed to visit my home?**

The relevant guidance is [here](#).

If you have a carer or visitor who supports you with essential everyday tasks, they can come to your home. We do advise that upon arrival, and often throughout their visit, they wash their hands for at least 20 seconds.

It's also a good idea to speak to your carers about what happens if one of them becomes unwell.

If you need help with care but you're not sure who to contact, your local council should be able to help you or please visit <https://careinfoscotland.scot/topics/how-to-get-care-services>.

### **What should I do if I am a carer for someone with a dermatological condition?**

Coronavirus (COVID-19) can have serious effects on anyone who has a long-term health condition or a weakened immune system, including some people with a dermatological condition.

If you're caring for someone who's vulnerable, there are some simple steps that you can take to protect them. You should follow advice on good hygiene, such as:

- Wash your hands on arrival and often - use soap and water for at least 20 seconds or use hand sanitiser
- Cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- Put used tissues in the bin immediately and wash your hands
- Don't visit if you're unwell and make alternative arrangements for their care
- Provide them information on who they should call if they feel unwell (their GP phone number and 111) and how to use NHS inform

- Access advice on creating a contingency plan from Carers UK
- Find out about different sources of support that could be used
- Look after your own well-being and physical health

Advice for unpaid carers is also available at:

<https://www.gov.scot/publications/coronavirus-covid-19-advice-for-unpaid-carers/>.

## How can I maintain positive mental health?

There are simple things you can do that may help you maintain positive mental health. These include:

- Exercising regularly
- Spending time doing things you enjoy – this might include reading, cooking, other indoor hobbies or listening to/watching favourite radio or TV programmes
- Eating healthy, well-balanced meals
- Drinking enough water
- Trying to avoid smoking, alcohol and drugs
- Keeping your windows open to let in fresh air
- Arranging a space to sit with a nice view, if possible
- Getting some natural sunlight if you can or sit on your front step, staying more than 2 metres away from others

You can get support in dealing with anxiety about coronavirus (COVID-19) at:

- <https://clearyourhead.scot/>
- <https://breathingspace.scot/>
- <https://www.samh.org.uk/>
- <https://www.supportinmindscotland.org.uk/>

If you are self-isolating and experiencing much higher levels of distress than is normal for you and you are struggling to cope with day-to-day things this might be useful:

<https://learn.nhs.scot/28084/coronavirus-covid-19/psychosocial-support-and-wellbeing/tips-on-how-to-cope-if-you-are-worried-about-coronavirus-and-in-isolation>

NHS Inform has further resources to help your mental wellbeing:

<https://www.nhsinform.scot/illnesses-and-conditions/infections-and-poisoning/coronavirus-covid-19>

## Update to advice for those who have not been asked to shield

You can keep up to date with any changes [here](#).

It's important to remember however, that those over the age of 70 without an underlying health condition and under the age of 70 who receive the flu jab for medical reasons are still classed as being at an increased risk from severe illness from COVID-19 and should be particularly careful in following physical distancing measures along with hand washing and cough hygiene.
